### CONNELL RED

*A new high quality apple*

We are proud to offer this fine new apple the first year it is being offered for sale.

Connell Red is solid bright red in color, is large sized, and has a very distinctive flavor that is excellent for eating as well as mild flavored for sauce or salads. Best of all the tree is hardy and the fruit hangs well to the tree, yet is easily picked. Fruit keeps very well and with good storage should last until May.

We believe Connell Red to be very well suited for our midwest conditions and also that it will prove to be the most salable apple ever before offered from our trade area. Connell Red was discovered by William F. Connell in his orchards at Menomonie, Wisconsin as a Red Sport of the variety Fireside.

## CANNAS

Cannas make the best showing when planted in beds by themselves. The soil should be well fertilized and worked up thoroughly to a depth of 10 to 12 inches. The bulbs can be set about 12 inches apart and about 4 to 6 inches deep. Mulchings with lawn cuttings will help retain the moisture. Start bulbs in pots indoors in March or April. Do not set out until all danger of frost is over; about June 1st here in the Northwest.

City of Portland. Large blooms in good-sized clusters, medium rose-pink, strong stems well above the green foliage. One of the best pinks.

The President. 4 ft. tall. Glowing scarlet, blue-green foliage. Extra large trusses of brilliant color. The finest Red Canna of today. The foliage is entirely free from disease.

Yellow King Humbert. 5 ft. tall. Deep rich yellow, heavily spotted and flecked with deep red. Green foliage.

Red King Humbert. 5 ft. tall. The grandest Canna ever offered, a king in reality. The heart-shaped leaves are purple-madder over-bronze. The plants are crowned with immense heads of orchid-like velvety orange-scarlet, rose-tinted and blossoms incomparably beautiful.
